

Enjoy Instant Hot Water.

With Wilo's Domestic Hot Water Recirculation System!

Save Water.

- Don't let gallons of water go down the drain while you wait for hot water! A DHW system can save thousands of gallons of water per year!

Save Energy.

- Consuming a maximum 32 watts of power, the Z-15 is highly efficient. Add an aquastat and digital timer for increased energy savings!

Save Money.

- Saving water & energy means one thing at the end of the day: More cash in your pocket!
