AGRICULTURE

As Smart Urban Areas grow, agricultural spaces are spreading to urban structures. Green roofs, vertical farms and inner-city plots of land used for agriculture will improve the supply and the climate of urban areas. Our innovative product solutions support the sustainable design and redesign of conventional irrigation systems in both traditional and unconventional agriculture. Above all else, sustainable and efficient water management prevents the unnecessary lowering of the groundwater table and ensures the careful use of water as a resource. As well as being particularly resource-conserving, from water extraction through to irrigation, our Wilo solutions contribute to climate protection through the use of renewable energies such as solar power and can even be used where there is no electricity infrastructure.

PIONEERING FOR SMART SOLUTIONS

Wilo produces pumps that guarantee maximum reliability, flexibility and efficiency. Our key services are positioned in the sectors of Water Management, Building Services and Industry.

We provide solutions for all scenes of the arena: heating or cooling of the facilities, water supply for the green and the sanitary facilities as well as wastewater treatment and transport within the entertainment areas.

That is why customers from all over the world trust in smart Wilo solutions.

Wilo-Stratos MAXO
Smart wet runner pump for heating, cooling, air-conditioning
- Highest system efficiency
- Fully integrated connectivity
- Best networking capabilities
- Intelligent control functions
- Online access

Wilo-Stratos GIGA2.0
Smart dry runner pump for heating, cooling, air-conditioning
- Bluetooth interface and remote access option
- Application-guided setting assistant
- Optimum energy efficiency
- ILE5 EC motor technology

Wilo-Actun ZETOS-K10
Submersible pump for raw water intake
- Maximum energy savings
- Compatible to control systems
- Demand-oriented system control
- Communication with BMS
- Online access to run signals

Wilo-Helix2.0-VE
Multistage centrifugal pump for pressure boosting
- Quick maintenance
- Optimized design for easy operation
- Communication with BMS
- Lower life cycle costs

Wilo-Rexa SOLID-Q
Submersible sewage pump for smart sewage pumping stations
- Maximum operational reliability and reduced service costs
- Lower energy costs
- Effective protection against corrosion provided by an optional Ceram coating
- Optional Digital Data Interface (DDI) with integrated vibration monitoring, data logger, web server and digital rating plate

Wilo-EMUport CORE
Solid separations system for sewage collection and transport
- Maximum operational safety
- Cost-effective and energy savings
- Durable and corrosion-free
- Flexible installation and easy to integrate

We provide solutions for all scenes of the arena: heating or cooling of the facilities, water supply for the green and the sanitary facilities as well as wastewater treatment and transport within the entertainment areas.

That is why customers from all over the world trust in smart Wilo solutions.
ABOUT WILO

The Wilo Group is one of the world’s leading premium providers of pumps and pump systems for the building services, water management and industrial sectors.

In the past decade, we have developed from a hidden champion into a visible and connected champion. Today, Wilo has around 8,200 employees worldwide.

Our innovative solutions, smart products and individual services move water in an intelligent, efficient and climate-friendly manner. We are also making an important contribution to climate protection with our sustainability strategy and in conjunction with our partners. We are systematically pressing ahead with the digital transformation of the Group. We are already the digital pioneer in the industry with our products and solutions, processes and business models.
