Wilo Pumps and Pumping Systems

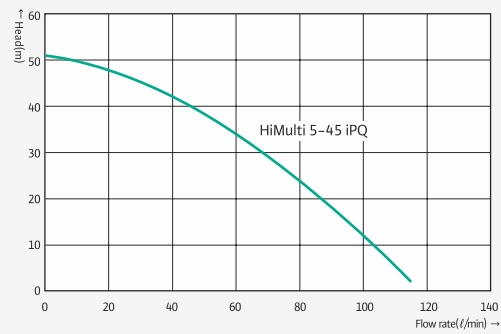

Wilo Solutions for Pressure Booster

Wilo-HiMulti5

Performance Curve

| | |
|-----------------------|--|
| Construction Design : | Low noise technology that helps you comfortably use the pressure pump without any noise. |
| Application : | → Water supply and boosting for housing, apartment and accommodation |
| Volume Flow Q Max : | 110 LPM |
| Delivery Head Max : | 50 mtr |
| Special features : | <ul style="list-style-type: none"> → Low noise level(50dB) thanks to two noise blocking covers and water cooling jacket without cooling fan → Corrosion resistance thanks to engineering plastic material → Energy saving up to 33% thanks to inverter technology it automatically changes the speed based on the amount of water used → It helps Wilo-HiMulti 5 to effectively use the energy as needed → Completely new design with LCD screen and green button → Various protection functions for safe and economic use : Over pressure, dry running, over current, over/low voltage, blocked rotor, anti-freezing / excessive temperature protection |
| Technical data : | <ul style="list-style-type: none"> → Voltage: 220V → Power: 1hp(0.75kW) → Noise level: < 50dB |
