ISH 2025: Wilo earns high marks for sustainable products, systems and solutions

Trade fair visitors experience the technology group's sustainable approach first hand

Dortmund/Frankfurt am Main. The Wilo Group can look back at a successful ISH 2025 – the world's leading trade fair for HVAC and water in Frankfurt, Germany. From 17 to 21 March, around 163,000 visitors from 150 countries had the chance to see and be won over by Wilo products, systems and solutions. Over 2,183 exhibitors from 54 countries showcased their products at the ISH.

"One of the biggest challenges of our times is and remains climate protection. The resource water plays an essential role in this context, both inside and outside of buildings", Oliver Hermes, President & CEO of the Wilo Group, explains. "The products, systems and solutions that we presented at the ISH 2025 lead the way because they contribute to overcoming the challenges associated with global megatrends. In doing so, they improve the quality of life of people around the world."

Under the motto 'Solutions for a sustainable future', this year's ISH focussed on environmentally friendly and efficient technologies. Wilo's core message 'We offer sustainable solutions' is derived from the impact area *Creating* anchored in its overarching sustainability strategy. "Our objective was to present our group-wide strategy and the three impact areas *Creating*, *Caring* and *Connecting* to a broad international trade audience and allow them to be experienced first hand. And we succeeded in this", says Peter Glauner, CEO and CSO of Wilo Europe.
